

Loving God...
Loving Each Other...
and Loving the World

December 29, 2010

To Whom It May Concern:

Recently our congregation purchased a Rodgers T-808 organ from Saied Music Company of Tulsa, OK. I cannot adequately describe just how pleased we are with our purchase. Our worship services have been thoroughly enriched by the quality of sound coming from our new organ. It truly has a pipe organ sound and feel within the sanctuary. Having taken organ classes in college I can attest to the fact that the quality of sound is equal to and in some cases far better than any of the pipe organs I have played over the years. We are also pleased with the salesmanship of Mike Bennett and David Pettit of the Saied Music Company. They were able to demonstrate the quality of their Rodgers organs through the several new organ installations in our area. They were also able to deliver a quality installation of our new organ just as they promised. Overall it was a very positive and enjoyable experience for us in searching for and finding the new organ we now have here at First Lutheran Church.

I highly recommend Rodgers Organs and the dedicated service of Saied Music Company to you as you begin your search for a new organ. You will not be disappointed by the quality of the product nor by the installation and service that will come with it.

Please give me a call about any questions you may have about our experience with our new Rodgers organ and with the Saied Music Company.

May God richly bless you as you seek to be good stewards of what He has entrusted to you and as you use it all to bring praise and glory to His Name.

In Christ,

Rev. Jonathan Beyer
pastor
